# Camargue

Carmargue er en av Europas største deltaer, skapt av elven Rhône i fylket Bouches-du-Rhone. NoF Travel hadde tur i dette omfattende området som består av; sump, myr, innsjø, saltvannslagune og risåker. Rhône-elven med sine to løp; både stor-Rhônen i østre løp og lille-Rhônen i vestre løp av deltaet, gjør Camargue til et unikt og svært mangfoldig naturområde i sør-Frankrike. Turen gikk gjennom fire forskjellige fylker; Alpes-de-Haute-Provence, Var, Bouches-du-Rhône, Gard og Hérault.

Det var seks deltakere på reisen til Provence og Camargue. Under turen besøkte vi også flere landsbyer. Blant annet den berømte landsbyen Aygues-Mortes, hvor den franske kong Ludvig den 9. startet korstoget til det Hellige landet Jerusalem på 13. hundretallet. Vi besøkte også Les Beaux de Provence. En annen kjent severdighet som var vel verdt å se.

Minibussen transporterte oss mellom de ulike fylkene. Vi overnattet på " le Mas des Lys" midt i sumpen, langs veien som fører til Les-Saintes-Maries-de-la-Mer.

Under turen ble 176 arter registrert. Målartene var blant annet hvitbuksandhøne, aftenfalk, rødfalk, hvitvingesvartterne, dvergterne, punersanger, vinsanger, haukørn, kalanderlerke.

Aymeric Le Calvez (lokal guide)

Éric Roualet (turleder)

Deltakerne ved " Le cirque de Navacelles"

## Tirsdag 30. April

Vi fløy fra Gardermoen til Nice og ankom tidlig om ettermiddagen. Deretter kjørte vi til Les Saintes-Maries-de-la Mer. Underveis hadde vi to stopp. På den ene like ved en søppelfylling langs motorveien opplevde vi mange svartglenter, en dvergørn og alpeseiler. Ved ankomst i Camargue møtte vi Aymeric vår lokale guide. Han tok oss med til Mas D'Agon og Mas Neuf for at vi skulle få med oss den første stemningen av fuglelivet der. Rørdrum, purpurhegre, flamingo, trostesanger, svartterne, kvitkinnsvartterne, og hundrevis av svaler ga oss et inntrykk av vårtrekket. En syngende svartrødstjert forfulgte oss under kveldsturen i Les Saintes-Maries-de-la-Mer.

Utsikt over Mas Neuf. I bakgrunnen Mas d'Agon. Et paradis for trostesanger! Foto: Eric Roualet

## Onsdag 01. mai

Morgenturen startet ved Les Impériaux for å lete etter trekkfugler. Grått vær og nedbør tvang oss til å trekke tilbake til hotellet til frokost. Rundt hotellet fant vi ut at det var et attraktivt sted for trekkfugler som bøksanger og svartvit fliesnapper. Etter regnskylltet kom sola og vi dro til Piémanson. Her hadde vi store forventninger om å se nylig ankomne små trekkfugler. Vi ble ikke skuffet over stedet. I busker og kratt fant vi mange småfugler. Forekomst av halsbåndfliesnapper og underartene *moltoni* og *albibstriata* av rødstrupesanger er kjent på denne lokaliteten. Vi brukte derfor tid på å leite etter potensielle fliesnappere uten å lykkes. Andre arter som rødstjert, gråfliesnapper, vaktel, vendehals, rødstrupesanger, gulsanger, løvsanger, rørsanger og to nattravn ble funnet. Det lokale fuglelivet der inkluderte; vannrikse, maskesanger, markpiplerke, gulerle av underarten *cinerocapilla* og sivspurven av underarten *whitherbyi*.

Kikking etter trekkfugler, Piémanson. Foto: Eric Roualet

Lunsj ved Camargues første ringermerkings-stasjon i Piémanson. Foto: Eric Roualet

Om ettermiddagen utforsket vi flere andre lokaliteter. Blant annen den nordligste delen av Fangassier som omfatter Frankrikes bestand av ca 17000 flamingoer og én chileflamingo. Arter som dvergflamingo, blåråke, bieter, pirol, spottesanger, skjeand, triel, brakksvale og sotsnipe ble funnet på de andre lokalitetene.

### Torsdag 02. mai

Vi startet tidlig og kjørte til Piémanson via La baisse des 500 francs. (På den sist nevnte lokalitet ble det sett en fjellmyrløper dagen etter.) Vi så etter vadere i brakkvannsområdet før Piémanson. Rødhodeand, svarthalsdykkere, dvergsniper, tundrasniper og hvitbrystlo ble nye arter for turen. I Piémanson var det mindre utbytte. Vi satte kursen mot La Fangousse og Marais Verdier for å finne brakksvaler. På disse lokalitetene fant vi

Gourmet lunsj ved l'Étang des Aulnes. Foto: Eric Roualet

våre første aftenfalker. To nydelig hanner jaktende etter insekter. Brakksvaler var ikke lett å finne, men noen ble sett i flukt. Totalt av sju individer ble notert. Brakksvaler liker halvtørt terreng med liten vegetasjon. I Camargue bruker de ofte rismarker som ikke er i bruk for å etablere seg. Små kolonier danner seg ofte på disse stedene, men fuglene blir ofte tvunget til forflytte seg til et annet sted, fordi risåkerene blir tatt i bruk og fylt med vann.

Timianblomst i Crau. Foto: Eric Roualet

Vi kjørte mot Crau og hadde lunsj ved l'Étang des Aulnes. En ringnebbdykker hadde holdt til her i flere måneder. Vi fant ikke dykkeren så vi dro til Crau. Crau er det eneste steppe-området i Frankrike som holder den eneste bestanden av sandhøns i landet. Hvitbuksandhøne så vi dessverre ikke denne ettermiddagen, men kalanderlerke, krattvarsler, triel, rødfalk, enghauk, og morsomme spillende dvergtrapper var noen av godbitene. På vei tilbake sjekket vi ved Chasagne og Mas d'Agon. Stedene ga hvitvingesvarterne, kirkeugle og skjærgjøk.

Én av de mange biotoper i Camargue Gardoise ved Pont des Tourradons. Foto: Eric Roualet

## Fredag 03. mai

Rolig dag med morgentur før frokost til Cacharel. Fortsatt bra med svartvit fliesnapper og gråfliesnapper på trekk, en lappiplerke og våre første tjeld for turen ble observert. Etter frokost ble det oppdaget en hortulan hann like ved terrassene våre pluss en overflyvende skjestork!

Lunsj ble inntatt ved Mas d'Anglas nær en frodig dam med beitende halvvritte camargue hester. Foto: E. Roualet

Camargue Gardoise er navnet på den vestlige delen av Camargue. Området består av sump, småkanaler med rik vegetasjon, takrør og dammer dekket av skog som holder den største hegerekolonien i området. Vinteren 2011 var tøff i Camargue og bestanden av dvergrørdrum og natthegre ble redusert på grunn av islagt vann. Derfor så vi ikke dvergrørdrum, men en rekke andre målarter fikk vi med oss. Skjeggmeis ble hørt og en hann sett. Andre arter som rovterne, topphegre, bronseibis, natthegre, skjæregjøk ble sett og én sultanhøne ble hørt.

## Lørdag 04. mai

Beauduc, en tilsvarende lokalitet som Piémanson som virker tiltrekende for trekfugler. Foto: Eric Roualet

Dagens tur førte oss til østdelene av deltaet. Vi besøkte Piémanson og Baisse des 500 francs igjen og på det første stedet var det mer svarthvit fluesnapper enn ved forrige besøk. På saltvannsgrunner fant vi 38 tundrasnipe og en del sandløpere. Seinere utforsket vi Beauduc og vi observerte mange vadere. Et rikt antall myrsniper, men også en del tundralo. Vi så også andre arter som tuteldue, eksanger, dvergterner, smalnebbmåke, blåråke, bieter.

Lønnealléen til Mas Saint Bertrand. Foto: Eric Roualet

Vi spiste lunsjen ved Mas St Bertrand, en koselig ”auberge” hvor vi nøt vårt måltid i hagen med overflyvende lerkefalk og slangeørn. Seinere kjørte vi til Le Fangassier i sør. På den andre siden av flamingokolonien var det rimelig bra med vadere, over tusen vadefugler ble anslått der. Videre besøkte vi La Fielouse. Det frodige området er hekkeplass for skjestorker. Fem aftenfalk ble også observert der. Ved La Capelière gjenfant vi sotsnipen, fortsatt på plass etter tre dager, artig! En busstur før middag i Cacharel ga oss dvergflamingo, storspove, tjeld og mange andre vadere. Som dagens avslutning på hotellet ble det hørt en syngende dverghornugle.

## Søndag 05. mai

Tidlig avgang til Crau, dagens utfordring var å finne hvitbuksandhøne. Etter en stund med leiting, kom en lokale ornitolog. Han pekte ut sandhøner høyt oppå himmelen for oss. Han plukket ut fuglene ut fra lyden, en helt annen lyd enn alle hadde forventet å høre, litt a la bieter. Vi fuglte en av dem med håndkikkert til den landet på bakken. I teleskopene våre fant vi ikke en, men 15 fugler.

Etter den flotte opplevelsen satte vi kursen mot Alpillene. Fjellkjeden består av furuskog, beitemark, ”maquis” kratt, nakne åser med bratte klipper dekket av kratt, busker og er leveområde for haukørn. Ørnen ble sett sittende på en topp i regnværet, mens sangere som vinsanger, rødstrupesanger var mer sky. Vi opplevde trekket av vepsvåker over åsene med mer enn 60 fugler. Andre arter som ble sett var enghauk, klippesvale, trelerke, alpeseiler og blåråke.

Vi hadde lunsjen ved en bieterkoloni. Fuglene hadde ikke ankommet på sine hekkeplassen. Det tyder på at biettertrekket var forsinket i år. Resten av dagen ble tilbrakt i Les beaux de Provence. Vi hadde også vår faste tur til Cacharel før vi satte oss ved middagsbordet.

## Mandag 06. Mai

Tidlig opp igjen! Dagstur til Les Causses de Blandas og Le Cirque de Navacelles som ligger litt nordøst for Montpellier i fylket Hérault. Les Causses er et mellomhøyt kalkplatå som ligger sør for Massif central. Området har en høy bestand av punersanger, med også andre arter som hortulan, vepsvåk, eiksanger, spottesanger og hekkspurv. Cirque de Navacelles er en spetakulær formasjon, en sirkel formet kløft med landsbyen Navacelles liggende i bunnen. Som karakterarter over kløften og i landsbyen fikk vi gåsegribb og alpekråke. På vei tilbake kjørte vi en liten sightseeing i Montpellier.

## Observasjoner pr lokalitet

### Lancon de provence Antall arter: 18 - 30/04

- 1 Svartsvane *Cygnus atratus* (Black Swan)
- 1 Stork *Ciconia ciconia* (White Stork)
- 1 Slangeørn *Circaetus gallicus* (Short-toed Eagle)
- 1 Dvergørn *Hieraaetus pennatus* (Booted Eagle)
- 1 Spurvehauk *Accipiter nisus* (Eurasian Sparrowhawk)
- 60 Svartglente *Milvus migrans* (Black Kite)
- Reg. Gulbeinmøke *Larus michahellis* (Yellow-legged Gull)
- Reg. Klippedu (Domestisert: Bydue) *Columba livia* (Rock Pigeon)
- 10 Ringdue *Columba palumbus* (Common Wood-Pigeon)
- Reg. Tyrkerdue *Streptopelia decaocto* (Eurasian Collared-Dove)
- 2 Alpeseiler *Apus melba* (Alpine Swift)
- 50 Tårnseiler *Apus apus* (Common Swift)
- 2 Tårfalk *Falco tinnunculus* (Eurasian Kestrel)
- Reg. Skjære *Pica pica* (Eurasian Magpie)
- 4 Kaje *Corvus monedula* (Eurasian Jackdaw)
- Reg. Svatkråke *Corvus corone* (Carriion Crow)
- 1 Ravn *Corvus corax* (Common Raven)
- Reg. Gråspurv *Passer domesticus* (House Sparrow)

### Mas D'Agon Antall arter: 46 - 30/04

- 8 Knoppsvane *Cygnus olor* (Mute Swan)
- 2 Gravand *Tadorna tadorna* (Common Shelduck)
- 20 Stokkand *Anas platyrhynchos* (Mallard)
- 8 Toppdykker *Podiceps cristatus* (Great Crested Grebe)
- 50 Flamingo *Phoenicopterus roseus* (Greater Flamingo)
- 1 Storskry *Phalacrocorax carbo* (Great Cormorant)
- Hørt Rørdrum *Botaurus stellaris* (Great Bittern)
- 5 Gråhegre *Ardea cinerea* (Gray Heron)
- 5 Purpurhegre *Ardea purpurea* (Purple Heron)

- 10 Egretthegre *Ardea alba* (Great Egret)
- 3 Silkhegre *Egretta garzetta* (Little Egret)
- 15 Kuhegre *Bubulcus ibis* (Cattle Egret)
- 1 Topphegre *Ardeola ralloides* (Squacco Heron)
- 20 Bronseibis *Plegadis falcinellus* (Glossy Ibis)
- 3 Sivhauk *Circus aeruginosus* (Eurasian Marsh-Harrier)
- 2 Musvåk *Buteo buteo* (Common Buzzard)
- 40 Sothøne *Fulica atra* (Eurasian Coot)
- 2 Vipe *Vanellus vanellus* (Northern Lapwing)
- 50 Stylteløper *Himantopus himantopus* (Black-winged Stilt)
- 20 Gluttsnipe *Tringa nebularia* (Common Greenshank)
- 15 Grønnstilk *Tringa glareola* (Wood Sandpiper)
- 1 Smalnebbmåke *Chroicocephalus genei* (Slender-billed Gull)
- Reg. Hettemåke *Chroicocephalus ridibundus* (Black-headed Gull)
- Reg. Gulbeinmåke *Larus michahellis* (Yellow-legged Gull)
- 2 Sandterne *Gelochelidon nilotica* (Gull-billed Tern)
- 2 Svarterne *Chlidonias niger* (Black Tern)
- 1 Hvitkinnsvarterne *Chlidonias hybrida* (Whiskered Tern)
- 7 Makrellterne *Sterna hirundo* (Common Tern)
- Reg. Klippedu (Domestisert: Bydue) *Columba livia* (Rock Pigeon)
- 20 Ringdue *Columba palumbus* (Common Wood-Pigeon)
- 2 Alpeseiler *Apus melba* (Alpine Swift)
- 500 Tårnseiler *Apus apus* (Common Swift)
- 2 Tårfalk *Falco tinnunculus* (Eurasian Kestrel)
- Reg. Skjære *Pica pica* (Eurasian Magpie)
- Reg. Svatkråke *Corvus corone* (Carriion Crow)
- 1000 Sandsvale *Riparia riparia* (Bank Swallow)
- 50 Låvesvale *Hirundo rustica* (Barn Swallow)
- 1 Amursvale *Cecropis daurica* (Red-rumped Swallow)
- 3 Cettisanger *Cettia cetti* (Cetti's Warbler)
- 2 Rørsanger *Acrocephalus scirpaceus* (Eurasian Reed-Warbler)
- 10 Trostesanger *Acrocephalus arundinaceus* (Great Reed-Warbler)
- 1 Cistussanger *Cisticola juncidis* (Zitting Cisticola)
- 20 Star *Sturnus vulgaris* (European Starling)
- 4 Kornspurv *Emberiza calandra* (Corn Bunting)
- Reg. Gråspurv *Passer domesticus* (House Sparrow)
- Reg. Pilfink *Passer montanus* (Eurasian Tree Sparrow)
